

MillerZell Sustainability Policy

MillerZell, Inc. a leading provider of Screen, Litho and Digital based solutions, has enhanced our environmental mission statement to encompass sustainability. We engage in responsible material sourcing and use of resources, as a key part of our leadership position in our community and industry. We strive to be an outstanding corporate citizen, a key part of this commitment is a focus on managing all the company's activities in an environmentally, healthy and safe responsible way. We regularly seek to reduce waste, find ways to reuse and recycle; and use energy more efficiently.

To MillerZell, social responsibility includes providing a workplace with equal employment and business opportunities for applicants, employees, customers and visitors; while complying with applicable local, state and federal laws, including but not limited to employment, safety and environmental requirements.

- Establish and maintain a formal management system that addresses all aspects of the MillerZell Printing Production categories.
- Foster continuous improvement in all of our business activities and share information with Employees & Stakeholders on our environmental performance.
- Where feasible, continually work with our supply chain to increase the use of materials derived from renewable resources or with low environmental impact.
- Increase our use and reuse of production by-products, establish take-back programs and improve industry recycling networks.
- Identify and establish a suitable means of communication with customers, consumers and industry groups to educate and inform them about sustainability.
- Continually improve and evaluate our environmental performance through periodic reviews and audits to ensure that our conduct is consistent with these principles.
- Comply with all applicable environmental, health and safety regulations, and commit to the principles of pollution prevention.
- Educate the customer and ultimate consumer regarding the benefits of a restorative economy.

We observe the guiding principles of the Sustainable Green Printing Partnership. For more information on these principles and our requirements as a partner, please see www.sgppartnership.org
